EISENHOWER MATRIX:

	Urgent	Not Urgent
Important	**Do:** ● Connect to USDA Food Data Central API and create an API key ● Allow users to search for food ● Allow users to enter food amount in grams ● Display carbohydrates, proteins, fats, and calories ● Put a timestamp on this data for each day	**Schedule:** ● Design a good user interface ● Allow users to enter multiple food items for each meal ● Improve error handling features, and missing data for particular foods ● Add a food intake summary per day
Not-Important	**Delegate:** ● Do not create own food database, fetch the data using an API ● Use cron for nightly automatic totals	**Delete:** ● Social media sharing/posting features ● Advanced AI features and insights ● Detailed fitness recommendations ● User accounts and login systems
